DETAILED ACTION

Response to Preliminary Amendments

Applicant's preliminary amendment filed on 1/16/2001 to cancel claims 1-31 and 68-100 without prejudice, has been considered and entered.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 32- 67 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 32-67 are allowed over the prior art of record. The prior art fails to teach or suggest a method and an apparatus for creating ultrasonic image that integrates with delta-sigma feedback control technique which implements means for storing and retrieving a delta-sigma modulated transmit signal stream; means for delaying at least some samples of the transmit signal stream to form a statically focused and steered transmit beam and for delaying at least some samples of a plurality of digital signal streams from a delta-sigma modulator to form a dynamically focused and steered receive beam; means for detecting an end of the transmit signal stream; means for switching a transducer for receiving a plurality of analog signal streams returned from the transducer; means for delta-sigma modulating the analog signal streams to form the digital signal streams

Application/Control Number: 09/760,531

Art Unit: 2819

which are dynamically delayed in the means for delaying; means for maintaining synchronism between the delta-sigma modulator and a delta-sigma demodulator in response to each change in the dynamic delay of the digital signal streams; means for summing a corresponding set of samples of the modulated and delayed digital signal streams; and means for basebanding and filtering the summed digital signal streams.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not replied upon is considered pertinent to application's disclosure. The cited reference relate to delta sigma with feed back technique.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM T MAI whose telephone number is (571)272-1807. The examiner can normally be reached on 6:00 am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Tokar can be reached on (571) 272-1812. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
